

MICROCON[®]

WHOLE HOME HEPA

350
675

The Microcon[®] 350 and 675 'whole home' HEPA Air Filtration system is easily installed in your home's HVAC or air handling system to provide 99.97% airborne particulate reduction without impacting air flow, static pressure or unit sizing. This whisper quiet air filtration system is extremely efficient for dust, pet dander, pollen and VOC removal. This unit is recommended for areas up to 5,000sq ft.

MICROCON® 350 / 675

Features:

- No effect on AC blower
- Insulated cabinets for whisper quiet operation
- Low maintenance, HEPA cartridges can last up to five years depending on the environment being filtered
- Energy efficient due to effective design and quality motors
- Our Microcon filtration systems are constructed out of durable steel and finished with baked on powder coat paint
- Environmentally friendly
- VOC Canister contain carbon with 1,705,000 m² of absorbent surface area for capturing chemicals
